News Release

Teledyne Continental Motors and ATP Team Up to Distribute Technical Publication Data

July 9, 2008 – Brisbane, CA – ATP (Aircraft Technical Publishers) delivers single source, expedited access information for aviation professionals across the globe. ATP announced today that they have entered an agreement with Teledyne Continental Motors to provide Teledyne’s technical publication content to the general aviation industry.

“We are extremely pleased to have this information distribution partnership with Continental Motors” says Caroline Daniels, ATP CEO. “Having one of the world’s most respected aircraft engine manufacturers partnering with the leading provider of compliance and safety information management allows both companies to better reach and serve our customers and our industry” Daniels concluded.

“Today’s announcement represents yet another step that Teledyne Continental Motors is taking down the path of providing a world class customer service experience for maintainers, overhaulers, and the industry at large” says Zou Abdelnour, TCM’s Vice President of Marketing, Customer Service and Sales. “Our partnership with ATP will provide customers the flexibility of utilizing search tools, that many already have in use, to easily and efficiently access volumes of technical information without the need to learn a new software application – a service we can all truly appreciate.”

Teledyne Continental Motors’ technical data will be provided through ATP’s NavigatorV® digital platform – the independent industry standard for compliance and safety information management. ATP will also provide access to TCM’s catalog of services provided on their website: www.tcmlink.com. TCMLink.com is an online business solution that provides high quality, personalized and integrated services to FBO, Aviator, Distributors and OEM partners.

To learn more about how to take advantage of this new joint service, visit www.atp.com.
