Teledyne Continental Motors Announces Retirement of John Oakley

Mobile, Alabama – December 19, 2007 - Teledyne Continental Motors announces the February 1, 2008 retirement of John Oakley, Special Manufacturing Advisor to Teledyne Continental Motors' President, Rhett Ross, after a distinguished 10-year career at Teledyne Continental Motors (TCM).

“John Oakley joined the piston engine operations of TCM in December 1997 after a distinguished career in manufacturing at General Motors,” said Rhett Ross, president, Teledyne Continental Motors. “Since joining TCM, John Oakley’s efforts for the company are obvious to all who walk through TCM’s manufacturing operations. Oakley’s contributions to the recapitalization of the facility and establishment of a lean production mindset provide an outstanding example of involved leadership, dedication and loyalty to a common goal, and to the difference that a single skilled and dedicated employee can make for the company.”

“I want to thank John for his leadership in realizing our long standing vision of a competitive manufacturing facility in our Teledyne Continental Motors’ operations,” added Robert Mehrabian, chairman, president and chief executive officer of Teledyne Technologies.

Teledyne Technologies is a leading provider of sophisticated electronic components, instruments and communication products, systems engineering solutions, aerospace engines and components and on-site gas and power generation systems. Teledyne Technologies has operations in the United States, the United Kingdom, Mexico and Canada. For more information, visit Teledyne Technologies’ website at www.teledyne.com.
